

Sopot 11th April 2022

To all scientific institutions in Russian Federation

With deep regret, we want to announce that all official contacts between Institute of Oceanology Polish Academy of Sciences and Russian Federation research institutes are suspended.

We may not accept the cooperation with the country that committed unjustified aggression and war crimes against civilians. When Russia will return to the world of democratic countries we will be more than happy to restore our traditional links.

Director of IOPAN
