

Seminaria Zakładu Ekologii Morza 2023-2024

12.10.23	Marta Szczepanek	Rola materii organicznej w kształtowaniu różnorodności i struktury troficznej zespołów bentosowych w przybrzeżnej strefie południowego Morza Bałtyckiego
19.10.23	Marlena Szeligowska	Dynamics of plankton and particles distribution in the coastal Arctic waters affected by glacial meltwater (West Spitsbergen)
26.10.23	Anna Sowa	Multiannual variability in the recruitment of Arctic benthic fauna – a field experiment on an artificial substrate
9.11.23	Bernabé Moreno	Succession of rock-encrusting assemblages in the rapidly changing environment of arctic coastal shallows
16.11.23	Laura Morales Luna Hadryś	Feeding frequency of Arctic filter feeders in the era of Atlantification - comparison of warm (2017) and cold (2020) years.
23.11.23	Emily Chen	Life at both edges of the globe – bipolarity concept tested on pelagic ostracods
7.12.23	Michał Gintowt	Analysis of the quality of benthic habitats using biological indicators based on the sensitivity of macrofauna species
14.12.23	Weronika Patuła	Spatial and temporal variability of the hidden Arctic meroplankton diversity as a key for understanding rapidly progressing environmental changes (HIMERO)
4.01.24	Kamil Regina	Impact assessment of environmental conditions on the ecology and geochemistry of calcareous algae (Corallinales, Rhodophyta) in western Spitsbergen (Arctic)
12.01.24 (piątek)	Marta Łukasik	Tidal flats and the climate change
18.01.24	Patrycja Nowakowska	How do submerged anthropogenic objects alter a benthic environment in their proximity?
25.01.24	Jan Marcin Węśławski	MARine Biodiversity and Ecosystem Functioning leading to Ecosystem Services MARBEFES
1.02.24	FERIE	
8.02.24	FERIE	
15.02.24	Monika Kędra	Coastal Ecosystem functioning under different anthropogenic pressure - linking Benthic communities And biogeochemical Cycling in the southern Baltic Sea (COMBACK)
22.02.24	Marta Ronowicz	Influence of Atlantification on Succession and biotic COMponents in the shallow hard-bottom Ecosystem in the Arctic (ASCOMEA)
29.02.24	Józef Wiktor	Ecology of polar protists (projects MOSAIC, NANSEN LEGACY, WOBEC, Kongsfjorden monitoring)
7.03.24	Piotr Kukliński	High resolution multi-parameters measurement of shallow subtidal Arctic environment conditions and their implication for local biota – (ANALOG project)
14.03.24	Piotr Bałazy	FUND - Filter Feeders UNDER change - unknown annual feeding strategies to be revealed by underwater time-lapse imagery
21.03.24	Kaja Bałazy	(ORANGE) When colour matters - key Arctic zooplankton species as a source of carotenoids for seabirds during breeding period
28.03.24	Katarzyna Błachowiak-Samołyk	Research and Innovation Framework Programme; Coastal ecosystem carbon balance in times of rapid glacier melt (CoastCarb)
4.04.24	Sławomir Kwaśniewski	Impact of Atlantic Water on zooplankton TAXonomical and FUNctional structure in Arctic fjords (Tax4Fun)
11.04.24	Maria Włodarska-Kowalczyk	Metabarcoding applied in revealing environmental stressors effects on the coastal benthic diversity in the warming Arctic (MetaDivA)
18.04.24	Katarzyna Grzelak	DRAGONnest- Exploring Mud DRAGON Biodiversity Patterns in the Arctic

25.04.24	Emilia Trudnowska	The ecological plasticity of the keystone Arctic zooplankton species (ecoPlast) + T-Trait & Rock2Carbon projects
9.05.24	Marta Głuchowska	When co-existence means separation — ecological niche partitioning between sibling zooplankton species in warming Arctic (TWINS)
16.05.24	Rafał Boehnke	LAPSE: What really matters for a High-Arctic zooplanktivorous seabird foraging in rapidly changing environment - prey size or energy content?
