

Department of Paleoceanography- seminars 2023

Thursday, 10.00 a.m., small conference room

Date	Speaker	Title
27.03.2023 <i>Monday, 11.00 a.m., big conference room</i>	Jan Pawłowski	Environmental genomics for marine benthic monitoring
20.04.2023	Magdalena Łacka	Influence of the climatic and anthropogenic change on the fjordic environment of the Faroe Islands fjords over the last century
11.05.2023	Maciej Telesiński	6.7 ka BP cold spell in the Nordic Seas: a potential trigger for a global cooling event?
25.05.2023	Joanna Pawłowska	Application of metagenomics in paleoceanographic reconstructions.
15.06.2023	Dhanushka Devendra	Resolving Holocene sea-ice dynamics and paleoenvironment in the southwest Svalbard shelf: Interplay between water mass changes and sea-ice dynamics
22.06.2023	Małgorzata Szymczak-Żyła/ Ludwik Lubecki	Application of lipid molecular markers for identification of organic matter sources in sediments from marine coastal areas
July-September		Summer break
5.10.2023	Ngoc-Loi Nguyen	Eukaryotic diversity from the ocean surface to the surface layer of sediments in Nordic Sea
19.10.2023	Natalia Szymańska	Climate change induced changes in foraminiferal assemblages of Hornsund fjord, Svalbard.
10.11.2023	Marek Zajączkowski	Vøring Plateau - the potential of paleoceanographic research
