

Seminaria Zakładu Ekologii Morza 2019-2020

7 XI	Marlena Szeligowska	Marine viruses - major players in the global ecosystem
14 XI	Anna Sowa	Processes of colonization and succession on rocky bottom in dynamic Arctic environment
21 XI	Emilia Trudnowska	Show me your garbage and I will guess how you live: spatio-temporal dynamics of two high latitude pelagic ecosystems based on the morphological traits of detritus + summary of the 'Mobility Plus' in Villefranche
28 XI	Maciej Chełchowski	Intertidal life: spatial distribution of benthic organisms in Antarctic intertidal zone
5 XII	Piotr Bałazy	Filtrators under change – unknown annual feeding strategies revealed by underwater time-lapse photography
12 XII	Joanna Piwowarczyk	Challenges for integration of the Polish fishing sector into maritime spatial planning
19 XII	Jan Marcin Węsławski	Why a seal exists? Teleology in nature management
9 I	Marc Silberberger	Combined effects of tissue-preservation and sample pre-treatment on stable isotope signatures
16 I	Barbara Oleszczuk	Structure and functioning of benthic fauna along depth gradient in Svalbard region
23 I	Rafał Boehnke	How the little-auk food changed across a decade
30 I	Zuzanna Borawska	The role of the benthic fauna in shaping biogeochemical processes in coastal zones of the southern Baltic Sea.
6 II	Marta Szczepanek	The structure and functions of macrozoobenthic communities from the coastal zones of the southern Baltic Sea
13 II	Sławomir Kwaśniewski	Spatial variations in taxonomic and functional diversity of zooplankton from boreal to Arctic seas
20 II	Józef Wiktor Jr	Diversity of sublittoral vegetation assemblages Zróżnicowanie zbiorowisk wegetacji sublittoralnej wschodniego wybrzeża Grenlandii
27 II	Mateusz Ormańczyk	The smaller side of zooplankton from the North Atlantic temperate and polar waters
5 III	Kajetan Deja	Tracing the benthic megafauna – Neoichnology in Spitsbergen region
12 III	Maria Włodarska-Kowalczyk	Benthic diversity and functioning in low-density <i>Zostera marina</i> meadows (Baltic Sea)
19 III	Katarzyna Błachowiak-Samołyk	Biogeography of planktonic ostracods across different hydrographical zones of Drake Passage (Southern Ocean)
27 III	Piotr Kukliński	Antarctic echinoderms in local and global context
2 IV	Marta Ronowicz	Composition and seasonal dynamics of meroplankton community in a high Arctic fjord
9 IV		Wielkanocny czwartek
16 IV	Mikołaj Mazurkiewicz	Megafauna standing stocks and functioning in response to environmental conditions in Arctic coastal waters
23 IV	Paulina Bodurka	Recognising patterns in composition structure and distribution of pelagic ostracods along eastern Atlantic
7 V	Anna Piwoni-Piórewicz	Chemia węglowych szkieletów wytwarzanych przez bentosowe bezkręgowce z Morza Bałtyckiego (próbna obrona)
14 V	Agnieszka Tatarek	Macroalgae of Spitsbergen
21 V	Anna Kubiszyn	Temporal and spatial variability in protist plankton structure in Isfjorden
28 V	Monika Kędra	Coastal Ecosystem functioning under different anthropogenic pressure - linking Benthic communities And biogeochemical Cycling in the southern Baltic Sea (COmEBACK) - first results
